

EcoFlex™ Sustainable Packaging Solution

Overwraps Flexibles has launched EcoFlex™ the first of many eco-friendly solutions to come. This high barrier polyolefin packaging is 100% recyclable under store-take-back programs and it is available in both roll stock and bags. Consumers and governments worldwide are demanding more sustainable packaging to achieve the goals of a circular economy. Brand owners looking to grow their business cannot afford to sacrifice graphics or a reduction in packaging performance.

EcoFlex™ is a sustainable solution suitable for the most demanding of applications.

EcoFlex™

**Recyclable Plastic
(Ready for Store
Drop-off Programs)**

Features:

- Made with 100% recyclable material
- Prequalifies for How2Recycle® Store-Take-Back programs depending on application
- Multi-layer film can be engineered for OTR & MVTR

About Overwraps Flexibles

Operating in Dallas, TX. for over 45 years, Overwraps is a leading converter of flexible packaging serving a vast array of market segments in the food and non-food industries with production of 10 color flexographic rollstock, stand-up pouches, and multiple other format recloseable preformed bags. The capabilities are supported by an in-house design and graphics department replete with plate-making on site. Overwraps has earned the highest Safe Quality Food (SQF) Safety and Quality Certification annually, since 2010.
